The World Didn't End
Fleischmann a Warning
Those Dull Masses
Mr. Rockefeller Gives
Current Events

By Arthur Brisbane
Copyright, 1925, by Mar. Co.

AS THIS IS WRITTEN, poor deluded, superstitious creatures in California and on Long Island are straining their eyes towards the sky, waiting for a flash to let them know that the end of the world is coming and that they, little miserable worms, have been chosen by the Almighty, from all beings on earth, to be saved and carried up in a cloud.

The unpleasant feature is a number of suicides caused by fright in connection with the ridiculous end-of-the-world predictions.

THE SCIENTISTS tell you that the world will not end for several hundred millions of years, barring a cataclysm in terrestrial space. And the sun is good for several hundred million years more. When the end does come, the difference between the average inhabitants of this earth, mentally, and Long Island's "Prophet of Doom" will be considerably greater than the difference between the "Prophet of Doom" and a cockroach.

LITTLE MR. REIDT, Long Island prophet, wisely postponed his end of the world for one week. It is necessary, it seems, for "the saints on the other planets" to mobilize for the last day.

It might surprise the prophet if he could realize how many of those other planets there are and to what extent the saints dwelling on them differ in outward appearance.

A reformed Seventh Day Adventist saint from the planet Mars, or from one of the planets that circle around the giant Aldebaran, would be worth seeing.

JULIUS FLEISCHMANN, dead on the polo field at Miami is another warning to men past forty-five. After that age, especially for those whose lives have been sedentary, the spirit is willing but the heart is weak.

Theodore Roosevelt, like Julius Fleischmann, died unnecessarily. His rugged mind and will outlasted his physical strength. When he should have been building up blood quality and resting his heart, he went training with a retired prize fighter, running long distances along hot roads in heavy sweaters. That was a direct invitation to the death which soon came. The blood, weakened, could not resist germ attack.

PROFESSOR WIGGAN, a biologist, is worried because, says he, the race of college men is rapidly dying out. They have few babies. That's going to destroy the mental quality of the country.

The gentleman says: "College graduates furnish nine out of every ten leaders in all branches. The masses never produce anything, create or discover or invent anything, worth while. These are all the products of separate unities."

That's interesting, especially to Thomas A. Edison, who never went to college. It would interest Abraham Lincoln also. He didn't go to college either.

As to national loss, due to the fact that college men have few children, the answer is that a man lacking the energy to have children isn't any great loss to a country.

JOHN D. ROCKEFELLER, JR., gives \$500,000 to help build a great Protestant Episcopal cathedral in New York, despite the fact that he isn't a Protestant Episcopalian.

In the old days of bitter religious hatreds, a rich, powerful man might have contributed to help burn the church of another faith. He wouldn't have given money to it.

In the old days men contributed to a church feeling that they were actually giving the money to God himself, propitiating a house for Him here on earth. Now men give through civic pride, quite a change.

THE HONORABLE Toyohito Kagawa says Japan wants only peace and isn't thinking about war at all. To prove it he Continued on Page 2, Column 5.

ANOTHER CHILD OF CURLEY STRICKEN

6 Taken in Plymouth Gun Fight RESCUED WITHIN 25 FEET OF COLLINS

For the second time within two weeks the gaunt spectre of tragedy reared itself in the Jamaica home of Mayor and Mrs. James M. Curley today. One week after the burial of four-year-old Dorothy Curley, her two brothers, fourteen months old, Francis X., was stricken with bronchial pneumonia. Two weeks to a day from the time Dorothy's ailment was diagnosed as lobar pneumonia, that of her brother was stricken.

ANOTHER OF MAYOR'S CHILDREN STRICKEN WITH PNEUMONIA

For the second time within two weeks the gaunt spectre of tragedy reared itself in the Jamaica home of Mayor and Mrs. James M. Curley today. One week after the burial of four-year-old Dorothy Curley, her two brothers, fourteen months old, Francis X., was stricken with bronchial pneumonia. Two weeks to a day from the time Dorothy's ailment was diagnosed as lobar pneumonia, that of her brother was stricken.

\$100,000 RUM, 6 MEN, SEIZED IN GUN FIGHT

Plymouth, Feb. 7.—Bullets whistled in a mad battle on the Atwood-street, lumber pier at North-Plymouth, before constables captured six men, five of whom gave Boston addresses, a truck, a launch and liquor and alcohol valued at \$100,000.

Thirty men were in the crew of rum smugglers that battled the coast guard men from North Scituate under command of Captain J. J. Glynn, but although many shots were exchanged, no one was injured.

The six captives gave their names as William O. Richardson, pilot, of Hull; Dominic Palanda, stevedore; Louis Lewis, thirty, John Reedy, George Martin and "Lag" Lagan, all of Boston. Richardson is detained by the authorities to be the leader.

A motor launch, the CM, containing 700 cases of alcohol, was seized, and a truck, registered in the name of Charles O. Richards, Hull, and containing 700 cases of Scotch whiskey was also captured.

On the pier were 1,000 cases of Scotch whiskey.

BROCKTON FIRE LAID TO FOES OF CHURCH

Brockton, Feb. 7.—Fire of incendiary origin broke out in several parts of the Greek Orthodox Church at No. 37 South street today. Rev. Evangelos G. Triantafides, the pastor, declared he believed enemies of the church may have fired the building.

State Fire Marshal Neal has been asked to investigate.

Assistant Fire Chief Richardson, found a blazing heap of old benches in the basement and another independent fire in a store room on the ground floor. He believes the church was fired in several places.

Harry "Kid" Stone, a boxer, discovered the fire when he looked from a window in his room across the street. The damage was less than \$1,000.

GENERAL MITCHELL SALUTED IN BOSTON

By BERT FORD.

Full of fight and bubbling over with ideas for the national defense and development of aviation, Brigadier-General William Mitchell arrived in Boston today and was given a salute of eleven guns at the Army Base in South Boston.

He advocated appointment of a minister of defense for the country, to have a place in the Cabinet.

25 POLICE HUNT FOR "BOUDOR" BANDIT

Angered by the jeers of Boston's "Lone Wolf," the boudoir bandit, a special "Lone Wolf" detail of twenty-five men, was put on his trail today by the police.

On orders from Police Commissioner

or Wilson, one policeman from each of the twenty-one stations throughout the city will report each evening at the Back Bay station for the boudoir hunt.

In plain clothes, these visiting policemen will work with the four members of the Back Bay vice squad, late in plain clothes.

Through the Back Bay the special detail will patrol, most of them in pairs, until the boudoir bandit is caught.

COASTERS HURT IN CRASH

Photodigram shows how six coasters were injured in West Roxbury. Descending Poplar street hill on a double-runner, the steersman saw an automobile about to cross the intersection of Dale street. To avoid a collision he swerved the sled to the right and it hit a fire hydrant. At top, left to right, Doris Poley and Ruth Boyle, two of the injured.

WORK DESPERATELY IN FINAL ATTEMPT TO REACH VICTIM

Cave City, Ky., Feb. 7 (A.P.)—All operations in the shaft being sunk down in Sand Cave, where Floyd Collins has been entombed eight days, were temporarily suspended at 2:10 p.m. to permit three men to re-enter Sand Cave.

This, by the most encouraging estimate, brings them within about twenty-five feet of the victim. Progress thus far has been at the

BOYS, ADRIFT ON ICE CAKE, ARE RESCUED

Two sports Boston youths, drifting to sea on an ice cake in Dorchester Bay, were rescued today by two men, and then ran off home without making their identity known.

A strong wind blowing offshore, injured the ice cake from the rest of the pack while the boys were playing.

When they realized their predicament they screamed, attracting two policemen, who secured a boat at the Mousquito Fleet Club and rowed out to the rescue.

SALISBURY RUM CASE WILL BE REOPENED

The Salisbury Beach rum smuggling scandal, admittedly the case that caused open breach and event at the Federal Building today it only the removal of U. S. Customs.

CAVE RESCUE

Continued from First Page.

rate of half a foot an hour. About half the distance remains above the surface.

The speed with which the engineering work, said that when the shaft reaches a depth of approximately that of Collins, air drills will be used to prod through the stratum about the shaft floor.

WORKERS ENCOURAGED

Workers were somewhat encouraged today by the nature of the strata they had penetrated with a diamond drill. Further drilling indicated there was no limestone or sandstone of a depth greater than the surface.

Cloudy clouds continued to cause worry today. Rain would seriously interfere with the work, as the shaft has been started in the path of a natural surface drain from a wide area. A considerable flow of water likely would drop into the shaft, necessitating the pumping operation.

A third appeal for funds went out today from E. D. Caldwell, president of the People's Bank of Cave City, who is treasurer of the relief fund. Cash received amounts to only \$400, but money pledged by wire and in letters is expected to bring the total to \$150. Expenses, however, have passed the \$100 mark and are mounting.

Supply of commodities and equipment being brought to Sand Cave have nothing to do with any of the relief fund. E. D. Caldwell said today. He did not multiply the statements of the men who reached the cave today. He said that there was no danger of any disaster or outbreak. He said that the cave was ordered so that those on duty might be given a rest. It is also planned when the territory is cleared of its outlets because of the increasing size of crowd.

BROTHERS ORDERED AWAY

Collins, brother of the arrested man, has been ordered off the scene by the militiamen. It is charged that he fomented trouble through his men, talk and it was feared that the neighbors of the imprisoned man would turn on the rescuers and attack them.

The brother insisted the only way to save Floyd was through the narrow, underground passage where only persons of the slightest stature could pass. The strata experts tried out that a shaft must be dug from the surface of the ground. The brother insisted that the only way to save Floyd was through the narrow, underground passage where only persons of the slightest stature could pass.

der his plan the minister of defense would have control of the three sub-departments of defense—the secretary of war, secretary of the navy and a secretary of aviation. In this way, he said, there would be unified command and lack of confusion.

In a rapid talk with the press, General Mitchell, smartly dressed in "civil" and carrying a cane, diplomatically parried all questions that might lead to thickening the official dust kicked up in Washington. He studiously refrained from further charges, but he tackled without flinching the defects in the national defense.

He spoke kindly of Secretary of War Weeks, saying, "Mr. Weeks has always been most agreeable." Asked if Secretary Weeks favored a secretary of aviation and minister of defense, General Mitchell said the records in Washington would be the best answer.

"I think our country should have a force of 1,000 airplanes at least," added General Mitchell. "Not to be used as a standing military force in time of peace, but rather for peacetime service, such as mail delivery, hydrographic survey, blinding new air defenses, and commercial purposes. Every pilot trained and used peace time is a valuable unit for defense."

General Mitchell said he was sure that the country should have a force of 1,000 airplanes at least. He said that the country should have a force of 1,000 airplanes at least. He said that the country should have a force of 1,000 airplanes at least.

SAILED AWAY BY GUARDSMEN

Continued from First Page.

baby brother developed from a cold into a critical illness.

The second blow came with stunning force, particularly to Mrs. Currier, who said that she had been so taken by the affection she saw extended by the baby, that she had been so taken by the affection she saw extended by the baby, that she had been so taken by the affection she saw extended by the baby.

Worn by their suffering, the Mayor and his wife had planned to start tomorrow on a vacation trip to the South. But their plans have been cancelled and they are again at the bedside of one of their children, watching, waiting, and praying.

Francis, who was born in December of 1923, contracted a cold several days ago, and yesterday afternoon his condition became alarming. Last evening Dr. Martin J. Shaghai, the family physician, who had been called to the bedside of the child, diagnosed the child's illness as bronchial pneumonia. In an instant this was an extremely serious disease.

Today the child's condition was said to be dangerous, with the family gathered in the sickroom for another sorrowful vigil.

SALISBURY CASE WILL BE REOPENED

Continued from First Page.

jected out that the whole alleged conspiracy that involved the Salisbury police and chairman of the Board of Selectmen, together with others well known, with connections, had been secured by a jury.

The case came to a dead end a number of weeks ago after two defendants had pleaded guilty, two had pleaded nolo, and three others had been acquitted by a jury.

HOW CASES WENT.

Harry Burnham, commander of the Plum Island life-saving station; Francis Kolcher, proprietor of Hotel Denia, Salisbury Beach, and Herman J. Rich, owner of two large fishing vessels alleged to have been used in the rum smuggling, were the most important.

Since then the case has been suspended, with no further action having been taken. Mrs. Wilberbrand, who caused the removal or resignation of several district prosecutors in the Federal service, herself is being added to the list of persons in the Washington information during the next few weeks.

On the day that Judge Harris, then Federal prosecutor, was in the city, a telegram was received from Mrs. Miles Walker, Willimansett, assistant United States Attorney in Salisbury in charge of prosecutions, telling Judge Harris not to move further in the Salisbury case.

BIG NAVY BLOCKADE

Continued from First Page.

Big Navy Blockade. The United States Navy, including British, champagne and wine. Two other boats as the pier charged off in the darkness, escaping.

The capture of the boats, the authorities to be the largest ever made on the South shore.

Big Navy on Run. Rum Blockade. New York, Feb. 7.—Thirty-six pocket boats, a down coast guard cutter and several speedboats kept the government's regular dry fleet today are on watch off the New Jersey coast to prevent the smuggling of liquor from the largest rum depot assembled in the off the United States.

The liquor fleet was last reported four days ago off the Jersey coast, slowly moving northward. A rusty old steamer, described as a vessel of about 4,000 tons, had the prosecution. Trailing were smaller steamers, freshly painted in balling gray, several schooners and a converted yacht. Cues of liquor were piled high on the decks of some of the craft.

Their decks cleared for action, the government's dry fleet was kept at a distance of a few miles. On shore a new land patrol was instituted with motor cars manned by armed guardsmen to chase bootleggers should any of the liquor be smuggled through the tightening line of government boats.

The shore patrol covers thirty-eight miles from Beards Bay to Highland Beach, N. J. Superintendent Rosenbaum of the coast guard station at Asbury Park, who is in command of the patrol, said he was possible on twenty minutes' notice to communicate with any one of the patrol cars and order it to meet smugglers anywhere in his jurisdiction.

General Mitchell. Rebutted by Weeks. Washington, Feb. 7.—A thirty-year-old man, William Mitchell, assistant chief of the Army Air Service, for his criticism of the War Department's attitude toward aircraft development was admitted today by Secretary of War Weeks.

It came in the shape of a formal statement to the House, touching on the present controversy over the War Department's policy of restricting the development of the air service.

General Mitchell, who was in the World War, declared that the War Department's policy of restricting the development of the air service was "unintelligent and unjust."

Following a statement by the Secretary of War, Mitchell said that he was in the War Department's attitude toward aircraft development was admitted today by Secretary of War Weeks.

SAILED AWAY BY GUARDSMEN

Continued from First Page.

baby brother developed from a cold into a critical illness.

The second blow came with stunning force, particularly to Mrs. Currier, who said that she had been so taken by the affection she saw extended by the baby, that she had been so taken by the affection she saw extended by the baby, that she had been so taken by the affection she saw extended by the baby.

Worn by their suffering, the Mayor and his wife had planned to start tomorrow on a vacation trip to the South. But their plans have been cancelled and they are again at the bedside of one of their children, watching, waiting, and praying.

Francis, who was born in December of 1923, contracted a cold several days ago, and yesterday afternoon his condition became alarming. Last evening Dr. Martin J. Shaghai, the family physician, who had been called to the bedside of the child, diagnosed the child's illness as bronchial pneumonia. In an instant this was an extremely serious disease.

Today the child's condition was said to be dangerous, with the family gathered in the sickroom for another sorrowful vigil.

THOUSANDS HEED KING WINTER'S SUMMONS TO PLAY IN GREAT SNOW CARNIVAL

SEEK DANCE
NEED ONLY
OF SNOWS
DEGGARS

Under weather conditions so ideal that it is evident the Weather man himself, has put snowshoes over his back and gone a-merrymaking, New England is disputing in annual Winter carnival.

With the weather just cold enough to prevent the snow from melting—with a generous supply of warm sunshades and with skis all but cloudless, the thousands of pleasure seekers who are thronging northern New England are enjoying a perfect holiday.

Scarcely a community can be found in the whole of the North country that has not put on holiday garb. Thousands held in Boston by business during the week, thronged the North Station today, eager to join their friends in the outdoor sports that will continue in a score of communities over the weekend.

It would be difficult to say which community leads in the carnival spirit.

DARTMOUTH ENTERTAINS.

At Hanover the Dartmouth boys are proving themselves gracious hosts and are offering their fair visitors a program that includes everything from skiing and mushing with real dog teams, down to dancing in a Japanese garden. The alumni association has been transformed into the indoor pleasure spot.

At Jackson, N. H., the Boston Rotarians and their friends are enjoying themselves to the utmost. Single riding, skiing through the drifts, skating, tobogganing—even swimming in the frigid waters of the Wildcat River are among the sports that Hub folks are taking part in.

Miss Elizabeth Weston of Brookline, a member of the Rotary party, is the only one who thus far had taken a plunge into the Wildcat and her dip was unintentional. While crossing the stream on snowshoes the ice broke under her. She paddled her way along the rough ice until she found a place where she could draw herself from the water and today she is none the worse for her experience.

NEW HAMPSHIRE ACTIVE.

At Berlin, N. H., the annual Winter carnival is on in full swing. The town filled with visitors from all sections of New England.

At Meredith, N. H., all kinds of Winter sports are on, full blast. A baby show is one of the added attractions at the Meredith carnival.

Augusta, Me., is the mecca for the Maine High School students. The Winter carnival at Augusta was featured by the competitive events in which athletes from eighteen Maine schools participated. Many of the visitors are remaining in Augusta over the week-end.

In fact, scarcely a community can be found in Maine, New Hampshire or Vermont where the carnival spirit does not hold full sway, indicating that Winter sports are growing in popularity, despite the alluring diversions sent out from Florida, the West Indies and other places of so-called perpetual sunshine.

Let those who will pine for warmer climes. The majority of New Englanders are made of sturdier stuff. Not for them the insipid climate of Southern Winter resorts. Instead they bundle themselves up, and romp in the snow and ice, thereby restoring

Coal Mining in Mansfield to Be Resumed

Mansfield, Feb. 7.—Town Manager William Plummer has been notified that a textile company is to start a gang of men Monday at the West Mansfield coal mine. Water will be pumped out of the shaft and three shifts a day set to work.

For nearly 100 years, attempts have been made to mine coal in Mansfield and it is claimed the product is better than the coal mined in Rhode Island.

'DOLL' BALCON QUITS STAGE FOR NURSERY

Chicago, Feb. 7.—Mrs. Arthur Hammerstein, who was known to the stage and screen as Dorothy Dallen, also has forewarned the stage for the nursery.

Her philosophy of successful stage marriages is outlined in what she termed her husband's maxim, "Keep a wife laughing."

"My ambition is to have a boy and a girl, for whom I am perfectly willing to give up the stage. I don't think I'll ever play again, but just remain content being Mrs. Hammerstein."

In order to promote knowledge of the capabilities of the blind and the sale of the articles made by them, the report reads, "a permanent arrangement should be made in the hands of wages paid to employees being augmented by contributions from the State."

State departments, cities and towns and other public agencies should be required to purchase products made by the blind, the commission says.

450 TALES MEN CALLED FOR THIRY TRIAL

After finally consenting to be examined by a jury to determine his sanity, Dr. Raymond D. Thierly of Somerville, formerly connected with the state of the Massachusetts General Hospital, will go on trial for murder in Middlesex court at Cambridge Monday.

The physician is charged with slaying his brother-in-law, David M. Noble, in the Thierly home, last August. More than 450 tales men have summoned, the largest in the history of the county, and from 250 of these the jury will be selected.

Dr. Thierly was removed to the trial from the county, and from 250 of these the jury will be selected.

HOMES' FATHER HELD IN DEATH OF SISTERS

Los Angeles, Feb. 7.—S. C. Stone, 65, father of Jack Hoxie, film actor, employed as a night watchman in the residential district from which they and Nina Martin disappeared last August, was held in county jail today for further questioning concerning the kidnapping and deaths of the little girls. Their bodies were found in a shallow grave near their home here last Wednesday.

Stone, when arrested, declared he had found witnesses ready to testify that he was innocent of the crime, but he was held in custody for further questioning concerning the kidnapping and deaths of the little girls.

Collins' Dog Keeps Watch Over His Master's Prison

Cave City, Ky., Feb. 7.—A new visitor called at the cave. It was Old Troy, a dog which often accompanied Collins on his trips into the hills.

The dog found a spot on the cliff overlooking the cave, where he stayed all day, watching the mid-covered rector in their efforts to save his friend.

Russian Cabaret Supper Dance, February 17, Interests Smart Set

Prince Tournanov, Prominent Member of Boston's Colony of Muscovite Exiles, Busy Arranging Numbers to Be Enacted in Spacious Beacon Street Ballroom

By Betty Alden

A CABARET supper dance done in the Russian manner by Russians and for Russians is a vastly interesting affair on the social horizon. It promises a rare treat, indeed, and is sure to give more than a fillip of the unusual to the waning late-Winter season.

THE SPACIOUS BALLROOM of No. 46 Beacon street has been commandeered and Prince Tournanov, now so prominent in Boston's colony of notable Russians, is arranging the cabaret numbers.

A SUPPER COOKED by Russians and served in the Russian way is a feature, and the auspicious date is February 17. Mrs. Manning Emory and Mrs. Gardner Davis are at the helm and Charles Sumner Bird is their able assistant.

SOME FIFTY-ONE personalities—all of much distinction and social prominence—begin with Mrs. Randolph Morgan Appleton heading the list, and go right through the entire alphabet of smartdom.

PHILANTHROPY is of course, the underlying motive—as indeed what large festive staged by society has not that incentive? This time it is the refuge Russian children and young people in Europe who must be educated and for whom Thomas Whitmore has engineered so many successful affairs.

CONSTANTINE DELASH, a young Russian now the house guest of Miss Mary Wheeler, is keenly interested in the cabaret, and has many of the details in hand.

SOCIETY'S VARIOUS sets had such a full measure of civility on the cards for last evening. A trio of functions held between the Beacon street Russian Dinner and Althea Jayson's presentation affair at the Country Club.

OF COURSE, the young set forgot nothing out at the Country Club and needless to say the dance was fully in the extreme.

AS TO THE OPERA, beautiful, rich, warm and pleasing jewels did each their part to enhance the kaleidoscopic effect of light and color.

THE EDWARD N. BRANDEGERS' box show forth in the circle of the horseshoe, as Mrs. Brandegee played the gracious hostess. Twenty sets that made dance of the Russian housewife, Mrs. Roger Wolcott, a stately figure, in broad, white, diamond ornaments.

MRS. HAROLD PEABODY wore a wrap of ermine and black velvet over a gown of silver cloth with black and Mrs. James Lawrence was radiant in silver cloth combined with lovely gossamer antique lace.

MRS. JOHN B. PAINE of Boston and Weston, in a midnight blue velvet and wrap of black satin brocade with fur, came with her son, John B. Paine, Jr.

MRS. WILHELMY SAVED BY FRIEND

Doctor Advised Operation
Friend Said Try Lydia E.
PINKHAM'S Vegetable
Compound First

St. Paul, Minn.—"I was all run down from overwork and worry, had no appetite, could not sleep at night, and looked like a corpse. I have six children (five boys and one girl) and did not get my strength after my last baby was born. I was getting worse and thinner every day. The doctor said I had to go to hospital, but this I could not do on account of my family. So I went to a friend of mine and told her what the doctor had told me and she said, 'How do I tell you, try Lydia E. PINKHAM'S Vegetable Compound as I have done. It helped me.' So I started taking the Vegetable Compound and I noticed after the first few bottles that I felt considerably better. After taking 9 or 10 bottles I got over my fainting spells. Everybody who sees me now notices the great improvement in my health. I am gaining in weight and strength and am feeling fine. Eat well and sleep good nights."—Mrs. MARY WILHELMY, 309 Duke Street, St. Paul, Minnesota.

A recent census reports 98 out of every 100 women are afflicted by

Proceeds of Smart Affair to Be Used to Aid in Education of Refugee Children in Europe

THAT STUNNING matron, Mrs. F. L. W. Richardson, in black satin, held at the shoulders with strands of brilliant, also entertained.

MRS. RICHARD S. RUSSELL and Mrs. J. L. W. Richardson arrived together, Mrs. Russell in green and Mrs. Richardson in soft rose brocade satin.

THE DISTINGUISHED daughter of that distinguished Boston matron, Mrs. Joseph Montgomery Sears, in dignity took to look upon, with her slender height and charming coloring.

A NOTHER TALL and slender matron of the golden blonde coloring is Mrs. William Davies Sohier, Jr. (Gladys) Dwyer. Her super dance gown was pale rose crepe with deeper tones embroidered.

YOUTHFUL and PRETTY—A picture Mrs. George Richmond Fearing, 52, in pale rose crepe with clever design. Peggy Porter, in bright green metal cloth, and Mrs. Henry Persons King, Jr., in hyacinth purple velvet, were some of the younger people.

THOSE TWO EXTREMELY good looking sisters, Mrs. George von L. Meyer, Jr., and Mrs. Philip Wadsworth, in black and white, were in evidence.

THE LATTER was the youngest of Grace Brooks, and many were the greetings showered upon her.

MRS. MEYER is her hostess just now. The Butlers are living in Connecticut, and Mrs. Butler (Frances) is in Roxbury. Her dance gown was a smart affair of black velvet.

Dance and Dine

Mrs. George E. Warren, in smart attire at the Havana Country Club. She and Mr. Warren are spending the late Winter in Cuba.

She played the hostess at the Super Dinner for a large group of guests.

QUITE A THIRDS of the young married sets and the smart girls were in evidence.

MRS. BYRON DICK, in gold tulle, these over pale rose; Mrs. Valentina Hollingsworth, in black velvet with gold tracery; Mrs. Amor Hollingsworth, in black chiffon.

ROSSINI FARCE WELL SUNG BY OPERA STARS

Entire Chicago Company Cast Superb in "The Barber of Seville"

One more superbly talented group of performers for the performance at the Opera House of Rossini's "The Barber of Seville."

It was a splendid performance by an all-star cast. It is true that last night's was not the only way to present the opera, and that there was considerable cutting and rearranging. But taking the performance for what it was presented to be, namely, Rossini's opera, proved his comedy was well seen. His comic gestures and singing kept the audience laughing almost continually.

Elvira Dolan, a coloratura soprano sent to America, made her only Boston appearance as Rosina. Not only was she charming, but her voice has a quality that recalls Tetrazzini. It was clear in that range above high C which few singers capture profitably.

Don Basilio was played with an admirable comedy by Vittorio Treviani. Charles Hackett in the role of the Count, lover of Rosina, proved his versatility. Flashes the body of a dancer, was added in dramatic timing, who sang well. To complete the cast, Maria Chasson was the Bartolo, Mr. Cantini conducted.

CANADA SNOWSHOE CLUB TO MEET IN LEWISTON, ME.

Montreal, Feb. 7.—Five hundred snowshoers, representing all the important clubs in the Province of Quebec, were on their way today by special train over the Canadian National Railway for Lewiston, Me., to attend the annual convention of the Canadian Snowshoe Club, which is being held at Lewiston.

It is the first time in the history of the club that the convention has been held outside the Dominion. Excursion was made this year on the invitation of the citizens of Lewiston, it being considered first an international flavor would be given in the event which might result in stimulating interest in the winter sport.

The Canadians will be welcomed at Lewiston by Governor Bennett and a program extending through Saturday and Sunday has been arranged.

HOSPITAL TRIP AS SHE JILTS YOUTH

Catherine McNutt, photographed after City Hospital doctors had repaired damage inflicted by auto, who followed by dashing his head against a stove.

WOLENT SUITOR ZEAOTS STILL AND GIRL ARE REEFIE E PATIENTS IS NEAR

The appetito of Leo Galati of No. 50 Madison street, South Kent, has cost him a bride.

This doesn't sound so unreasonable when it is considered that pretty 15-year-old Catherine McNutt, his fiancée, was Leo's piece of resistance. From her cot at the City Hospital, where six stitches were taken in the young woman's lip, she told how Galati, while they were visiting his family, in a sudden burst of affection seized her, biting her lip, chest and hands.

After she checked his convulsive demonstration she told him she no longer loved him.

Disappointed over wrecking his romance, Leo repaired to the kitchen and decided to end his life. His method was as novel as his wooing, for he attempted to beat out his brains by crashing his head against the kitchen stove.

The police were called and took the couple to the City Hospital. There the young woman's wounds were treated and Leo's bruised head bandaged.

Although marriage intentions had been fixed, Catherine now insists she is through with Leo and that so far as he is concerned there will be no wedding bells for her. She is going back to Nova Scotia to forget all about him, she says.

XMAS FUND HELPER TO STUDY DANCING IN PARIS

Eleven-year-old Evelyn Landers, of No. 80 Beale street, Brookline, is going to Paris to continue her studies in dancing.

Because of a remark made by Frederic Chastain, sales assistant of the Chicago Opera Company, following dinner at the Landers home, the great Russian dancer, Eugene Landerer, was entertained informally by Miss Evelyn, who studies Russian dancing.

"Hello, said Chastain, when the child had concluded dancing for him. 'You should send her to Paris.'"

During the past two seasons Miss Landers has danced with the American Ballet in the American Christmas Basket Fund.

JACK AND ESTELLE AT SAN DIEGO FIGHT

San Diego, Cal., Feb. 1.—Jack Dempsey and his fiancée, Estelle Taylor, occupied ringside seats at a San Diego fight arena and watched Dempsey's progress, Joe Benkenin, Los Angeles lightweight, outpoint Johnny Heiser, former New York fighter.

When Dempsey was introduced, fans clamored for a speech. He responded with a few words, but avoided any mention of his plans.

AUTOIST IS HELD IN DEATH OF WOMAN

John B. Seidre, thirty, a carpenter of 19 Norwood street, Bedford, pleaded not guilty to operating an automobile on Broadway, Somerset, so as to endanger the lives and safety of the public, in Somerville Court, today, and his case was continued until next Thursday for trial.

Seidre was operating the automobile when it struck and knocked down Mrs. Mary Graham, sixty-two, of 30 Salem street, Bedford, causing injuries which resulted in her death.

CLARA SHEAR RISES FROM OBSCURITY TO CHICAGO GRAND OPERA ROLES

A Malden girl—an American "Main Street" girl—today watched the phantom galleon of dreams glide gently into port.

The ink on her contract still wet, Clara Shear of Pierce street, Malden, today went forth to meet the acclaim of local prophets—no longer an obscure singer, but a celebrated soprano of the Chicago Civic Grand Opera Company.

Staring up over the voices of scores of local singers, the Malden girl has been chosen a member of the famous collection of songbirds. She will open next fall with the company in Chicago.

Two days ago she sang for Clara Shear of Pierce street, Malden, today went forth to meet the acclaim of local prophets—no longer an obscure singer, but a celebrated soprano of the Chicago Civic Grand Opera Company.

PUPILS IN "CRUELTY" PROBE

Aroused by the indignation of parents, the Needham school committee has called a special meeting for Monday night to probe charges of cruelty to school children.

The angry parents have announced that in case the school committee fails to take action, the matter will be brought to the attention of the State Commissioner of Education.

It is charged that thirty pupils in the fifth grade of the Kimball Grammar school were struck with rubber tubing by Miss A. Lenore Crouse, a teacher.

H. R. Wainwright of No. 12 Mansuett road, a member of the school committee, said the whole matter will be thrashed out Monday.

Mrs. R. Whitbread of No. 40 Bradford street, one of the parents who make the charges, said:

"My little girl has always received 'A' in conduct, and the action taken was not at all the proper thing. The whole truth of the matter is that Miss Crouse lost her head. I believe she realized it when it was too late for her to warn the children not to go home and tell any wild tale."

"The teacher is a nervous woman. We let her a little bit last year. As soon as I found out she was doing what we will not stand for any such actions another minute. We bring children up differently."

"We are awaiting the results of the investigation now being conducted by Mr. Davis, the superintendent, and the school committee, before taking further action."

"It is a most unfortunate affair, for Miss Crouse is, in my opinion, one of the finest teachers we have and I fear she will be made the 'goat' in the coming school election," said Principal Irving D. Parker.

"Miss Crouse is so frail," he continued, "that she has not the strength to shake one of the children so I fall to me how she could have hurt them. The pupils in the fifth grade are very difficult to manage anyway, and she has complained to me several times during the course of this school year."

John C. Davis, superintendent of the Needham schools, has been invited to the hearing and has been asked to bring with him a list of the children who have been hurt and a list of the teachers who have been accused of cruelty.

The hearing will be held at 8 o'clock on Monday night at the Kimball Grammar school.

DREAMED THAT TOWN SO SLOW, EMPLOYER WAS PRISONER'S SET FREE

Providence, R. I., Feb. 7.—A dream that something was wrong at Gardner Miller's house, No. 248 Bennett street, led his chauffeur, Irving Wheeler, twenty-seven, to get out of bed at his home, around the corner, at 2:30 this morning, and so there and surprise an armed burglar, who got away with about \$100 in money, so the chauffeur told the police.

Wheeler, the proprietor of fidelity to the Milpore, the police were told, led himself in with his key to the house and snatched the electric light, he said. The burglar fled a shot, and escaped through a window. The chauffeur told the aroused household.

The Milpore's safe was found rifled of money, but \$13.15 in Liberty bonds and stocks, at first believed, were found later.

Bandits hold up five in New York office.

New York, Feb. 7.—Three armed men, who broke into the heart of the theatrical district, early today to raid the offices of the National Speculation Company, No. 141 Broadway and held up five men, reaping with \$131 in cash and a diamond pin valued at \$225.

Matthew Buckenberger, proprietor of the company, who was making a subscription war, was the loser. Four of his salesmen were lined up but were not robbed.

SEE WORDS TO PRIZES

Edith Rojean One of Allston Is Awarded First Prize of \$100

Persistence and the determination to come through, no matter the discouragement, carried Miss Edith Rojean on to the victor's goal.

Triumph came to her after a series of trials.

She had tried the Boston Evening

The discomfit of Boston postal employees over wage and working conditions has been intensified by the latest order which prohibits them from attending church services unless the time is marked up against their vacation period or is taken without pay.

The new order which comes direct from the office of Postmaster General Harry S. New revokes a time-honored custom in the postal service, and the announcement that President Coolidge favors the House postal pay raise bill failed to soften their resentment.

Hereafter, when a clerk or carrier wishes to attend church services he must notify his superior. The time that the employee is absent will be charged up against his annual vacation time. If the postal worker goes to church after noon, during the post, he will have no vacation coming to him.

So, if the employee elects, he may go to church, but Uncle Sam will deduct pay for the time the worker is absent.

The letter from the Postmaster General, which places the new order in effect, says:

"There has been occasional inquiry with reference to the policy of the department toward the matter of securing those employed in the postal service a sufficient time to attend church services on days that are not legal holidays, but which are observed by different churches as sacred days for special purposes."

The laws and customs of certain churches make the observance of certain days a duty, and the department desires to cooperate as far as it is reasonably possible in permitting the fulfillment of these duties. Under the law, unless on legal holidays, the time will have to be charged to annual leave or to leave without pay. The department is of the opinion that the postal employee may be required as well permit him to secure substitute employees sufficient to moving the mails and reasonably accommodate the public."

Second Week's Prize Winners

FIRST PRIZE—\$100.
Edith Rojean One, No. 153 Brighton avenue, Allston, Mass.

SECOND PRIZE—\$50.
Clarence Johnson, No. 6 Second street, Newbury, R. I.

THIRD PRIZE—\$25.
Sydney Ashley, No. 384 North Main street, Fall River, Mass.

FIVE-DOLLAR AWARDS.
Mildred E. Hutchinson, No. 1874 Washington street, South Braintree, Mass.

David C. Coleman, No. 1115 Pleasant street, Beverly, Mass.

Thomas L. Shepard, No. 111 Mill street, Dorchester, Mass.

E. C. Grosfeld, No. 12 Argyle street, Melrose, Mass.

Mrs. Walter L. Foster, No. 111 Pine street, Danvers, Mass.

Bernice Ryan, No. 234 Main street, Gloucester, Mass.

Hope M. Benjamin, No. 6 Browning avenue, Dorchester, Mass.

Mrs. E. L. Clarke, No. 15 Belmont street, Everett, Mass.

Mrs. L. Lange, P. O. Box 532, Springfield, Mass.

H. V. Kever, No. 181 Rosemary street, Boston.

George E. Miers, No. 348 High street, West Medford, Mass.

William M. Postley, care State Sanatorium, Walpole Lake, R. I.

Charles D. Becker, No. 145 Paul street, Whitman, Mass.

Flora E. Keefe, No. 72 Cushing street, Cambridge.

Annie Gage, No. 31 Marshall street, Winter Hill, Mass.

OVERCOATS STOLEN AT SOMERVILLE HIGH
Four thefts of clothing in the Somerville High school were reported to the Somerville police today, making five thefts in two days. During the past few weeks the school has been the scene of a series of thefts. The first was a stolen overcoat, the second a stolen overcoat, the third a stolen overcoat, the fourth a stolen overcoat, the fifth a stolen overcoat.

IDENTIFY WOMAN AS DRUG PEDDLER'S WIFE
Philadelphia, Feb. 7.—The body of the young woman found dead in a rooming house here was today identified as Mrs. Marie Burke, wife of Dr. Herbert I. Burke, who is in prison for peddling narcotic drugs. The police think Mrs. Burke died from drugs. The key to a safety deposit box belonging to Dr. Burke led to the identification.

PARIS CHAMBER PASSES CHEAPER BREAD BILL

Paris, Feb. 7. (Universal)—The chamber of deputies early this morning passed Heriote's bread bill by a vote of 231 to 223.

The measure is destined not only to bring the price of bread, which is now 1 franc and 55 centimes, a kilogram, but also to control the prices and stocks of wheat.

Famous Firsts

By Mark Suyasant

PICK UP any book, newspaper or magazine, no matter how fine or cheap, and you will find it profusely scattered with illustrations in black and white, in one-line or in full color.

This is such a commonplace that it hardly seems worth mentioning except when we realize that the first quarter of the 19th century the process of reproducing pictures mechanically was not even in existence.

Paintings, drawings, engravings, had to be copied by an engraver or draughtsman on a metal plate of block of wood or stone before it could be transferred to the printing press.

It is easy to see that the copy could never be the same as the original and an engraver of real ability often reproduced an engraving as distinct in character as the original and often surpassing it. Engravings of this sort were cherished as works of art. But unfortunately, the results of this process were usually the reverse and many an artist saw his original ruined in reproduction.

The "process" for that is the technical name given to all mechanical reproductions of the original

of a discovery by Mungo Ponton, who found that a preparation of albumen and bichromate of potash could be hardened and rendered insoluble in water, i.e. at the same time, it is exposed to light. This discovery governs the production of process blocks or plates of all kinds.

The process which is used for pure line drawing is something as follows: The original drawing is placed on a sheet of metal which has first been covered with a preparation of albumen and bichromate of potash, and both are exposed to the light in the way an ordinary photograph is printed.

The light passes through the transparent lines of the negative and hardens the film underneath. The negative and metal plate are taken into a dark room, the plate is rolled with an inked roller, placed in a tank of cold water and allowed to soak until the albumen and bichromate are washed away everywhere except under the inked lines.

Nothing is left but the hardened lines which are dusted with asphalt, varnished, mounted on a block of wood and finished, ready for the printing press.

MEDBURY SAYS—

By John P. Medbury

NEW YORK social worker says that couples should never spoon until they're well acquainted. This may be good advice, but if they don't have will they get to know each other?

QND bug can do more than ten introductions.

A MAN may have that a girl is wonderful at kissing, but he usually wants it from her own lips.

STRANGERS never spoon longer than five minutes, because after that, they're no longer strangers.

A PETTING party is a wonderful thing providing you pick out the right party.

QF course a girl should never kiss a fellow the first time she sees him unless she thinks she's never going to see him again.

STOONING, however, is only he indulged in by two kinds of people, men and women.

FIFTY percent of the girls now a days expect to be hugged and the other fifty percent demand it.

WHEN a fellow takes a young lady home he doesn't stand out on the porch with her to get the trash.

MAKE QUICK DECISIONS

By Carolyn Lisberg

I WAS dining with a mother who belongs to that nice class, the wise and thoughtful parent. After dinner, just before bedtime, she allowed her little girl, aged six, to hear one record playing. More than that she absolutely refused.

"Which do you prefer to hear tonight, Agnes?" her mother inquired.

"The little girl stroked her lobbied yellow hair, stood on one foot, and said she'd like Robin Hood. Then she shifted to the other and said maybe the other would be prittier.

"Now, Agnes, make up your mind which you prefer," she admonished, "If you cannot tell me in one minute you will have to go to bed without hearing either."

Whereupon the girl plunged into a decision and said quickly: "Pinafore."

After Agnes had bidden us good night and left us her mother turned to me with the question: "Do you know the mainpring of this sonnet?" I had to act positively because you know, by nature, I am vacillating. I lost two years of happiness making up my mind whether or not to marry my husband. Now, I cannot be Agnes grow up cured with this vacillating indecisiveness, and I firmly believe by starting right now I can train her to overcome this weakness and get her into the habit of making decisions quickly."

BEDTIME STORY

Broadcast Daily Through WNAO

By Foxy Grandpa

"I HEARD some one talking the other day about a winged horse named Pegasus," said Bobby.

"Do you know anything about it, Foxy Grandpa?"

"I laughed and said: 'Well, Pegasus, Pegasus.'"

"Oh!" said Bobby. "Please tell me about it."

"Let me see," said I, scratching my head. "Oh! yes, now I remember."

"Once upon a time in the days of the Greek gods and goddesses, there once lived a young man by the name of Bellerophon.

"Bellerophon was the son of Glaucus and grandson of Bellerophon, who was King of Corinth.

"Now Bellerophon grew into a sort of a trouble. He accidentally killed one of his relations. So, naturally, to escape punishment he fled the country and landed in Argos, where he was received very kindly by the King.

"But something happened and the King of Argos became very jealous of the young hero, so he thought he would like to get rid of him. What did he do but send him to Joazeus, the King of the Lycians with sealed dispatches.

"The King of Argos in these dispatches asked the King of the Lycians to make away with this Bellerophon, but after that a tribe of people called the Solyim, who had caused the Lycians great

trouble but then defeated the great army of the Amazons, a nation of female warriors.

"Of course this was too much for the King of Lycians. After these great feats, he decided that Bellerophon must surely be related to the gods, so he received him kindly and even gave him his daughter in marriage.

"Then everything ended happily," sighed Bobby.

"Not exactly," I said. "Bellerophon was not satisfied with his lot but became too ambitious. He tried to fly to the heavens on his winged steed. This made Jupiter angry. So he sent a gadfly to sting the horse. The horse gave a lurch, on went Bellerophon and down to earth, where lame and blind from his fall he wandered piteously until he died."

"Some people never are satisfied," said Bobby shaking his head.

RADIO AMERICAN

\$7.00
EACH
WHY

KARAS Harmonik Transformers

Were Specified for the New American 4-R Receiver

Because they deliver a big volume of pure, natural undistorted music. They amplify low frequency sounds as they have never been amplified before in radio reception. They fully amplify the very high frequencies and thus bring out the vital harmonies and rich overtones, making full round, pleasing musical tones.

There are seven distinct, scientific reasons for the remarkable performance of this marvelous new transformer. Here they are:

- High Inductance—large coils
- Large Iron Core—easy path for lines of force
- High Impedance—accommodating all tube impedances
- Controlled Air Gap—high amplification of low frequencies
- Low Hysteresis Loss—saving all energy for amplification
- Scientific Circular Shielding—preventing howling due to coupling
- Perfect Uniformity—in production. All transformers alike in all factors.

Karas Harmoniks will vastly improve the musical quality of reception of any radio set. It is easy to substitute them for the old transformers in your present set. Order a pair from your dealer today.

KARAS ELECTRIC CO. 4440 N. Rockwell St. Chicago

Don't Throw Out Used Dry Cells

RE-VIVO
RECHARGEABLE
BATTERIES

Re-Vivo "A" and "B" Batteries look and feel the same as ordinary dry cells—but after they are used you can attach them to the house electric current and bring them back to original strength. This can be done 5 to 8 times. No technical knowledge or elaborate equipment is needed. Cost of recharging is negligible. Strong and not longer than any other make.

Whether your set is a home built or factory made it will give you the best results when operated on Re-Vivo "A" and "B" Batteries.

NEW 4-R RADIO RECEIVER

WETMORE-SAVAGE

Electric Supply Co.

(WHOLESALE & RETAIL) BOSTON SPRINGFIELD

GREAT INTEREST IN FOUR-R RECEIVER

Although not much data has been supplied so far, a great deal of interest in the new Four-R receiver is being shown by the public and dealers alike.

A large number of phone calls have been made from all corners of New England asking for more data on the set. We had one phone call from Philadelphia asking for the tube numbers of the parts.

The data on the new set will be released from day to day. Complete instructions on building the set and articles on each individual part will be published.

Many are calling in person at the Radio Laboratory to see and hear the new set. They are surprised at the sharpness of tuning and the wonderful quality of reproduction. The set on demonstration is an exact duplicate of all specified parts and the layout to be published.

From all indications this new receiver is going way ahead of any that have ever been published by this paper or any other. Reports from Providence indicate that the set is able to cut out WJAR within two blocks of it and bring in outside stations. This trouble is well known in that section. One set located on Tremont street, Boston, was able to eliminate all local stations and bring in others.

Reports from some of the jobbers indicate a run on the parts required for the set. Dealers should see that they are supplied with the parts.

If you are having any trouble getting parts call the Radio department and we will put you in touch with the proper party whether you are a jobber, dealer or consumer.

The first article will deal with suggestions for making this set up into a portable case. Because the set uses dry cell tubes, it may be built into a small case for Summer work.

DIAL NUMBERS DO NOT MEAN WAVE LENGTH

One of the most difficult things for new radio set owners to understand is that the numbers on the dial have absolutely no direct relationship to the "wavelength" to which the set can tune. The figures are merely intended as marks by which the operator can remember the adjustment on which stations are heard.

Some people seem to think that on a three dial receiver, for instance, the proper setting for any particular wavelength can be determined by dividing three into the wave figure, and then moving all the figure to the number that is found. This is absurd. The numbers can be replaced by the letters of the alphabet, and dial settings then recorded by means of the latter just as well.

No two sets, even of the same make, will bring in the same stations at the same dial readings. The set owner simply must play with the dial until a station is heard; then he should make a note of the settings on a piece of paper, which will be known as the "wave log."

In general, the wave-length of a receiver goes up as the dial is advanced from zero to maximum. Thus, short wave stations like WAAK, WFFH and WERY usually come in around 30 or 35 on the dial, while WABC, WNTC and KTW are heard at the upper end of the scale.

After all the local stations have been heard and their respective

findings marked in a chart like the one shown in the above drawing, a fairly good idea of how distant stations should be heard can be had. For instance, WAAK transmits on 315 meters. If it is tuned in on say 15, 25 and 35 on the dial of a set like a neophyte, then stations WAAK, WFFH and WERY should be found somewhere near 31, 33 and 35.

A little practice in guessing wavelengths in this manner will make the set owner quite adept at "tuning in" the DX broadcasters.

WATCH FOR SPECIAL ARTICLES ON EACH PART USED IN SET

By M. A. SIMMONS, Technical Radio Editor.

The above photographs show the new American Four-R Receiver in its completed form, with parts exactly as specified. You will note two different types of tubes are shown. These are the 12Y 12 and 12Y 130. The standard SIGNAL SOCKET-ETS were used so that any type of tube could be placed in the set for demonstration purposes.

With the completion of standard sockets and the amplifier for day control control, it is possible to use several different types of tubes in the same set and operating from a six volt battery. By the use of the proper American, a 12Y 12, 12Y 201 A, and a V. E. 211 A may be used in the same set, and all operating from a six volt storage battery.

In a later article there will be a chart showing the proper Ampere for each type of tube. This means that a person not having a full complement of one type of tube may use whatever he has on hand. However, the small capacity tubes 12Y 12-130 should be used in the Radio Frequency socket.

From this photograph you will get the general layout of the parts of the set. Note the angle and direction of the Antenna coupling. In mounting the binding post strip, be sure that you mount it high enough so that you may get at the base on the bottom of the post.

Although the base board layout will show the antenna binding post mounted on the same strip as the rest of the posts, you will see from the photograph that this was not done in this case. It is a simple matter to mount the antenna post as shown in the photo. It saves space and the position of the DUBILIER 1 MFD condenser which is placed under the antenna coil. Although it does not show in the photo, the ELECTRAD AUDION unit used for the Radio stage is directly behind the antenna coupling. Since one connection to this unit goes to the rotor of the MARCO variable condenser, it will make this lead very short.

The photo will help you to place the KARAS TRANSFORMER in the correct position. Note that the name plate on the transformer when viewed from the back, reads upside down.

The second ELECTRAD AUDION unit which is to be connected across the last audio transformer, has one side of it mounted directly onto the grid post of the last socket.

Note the rubber foot underneath the SIGNAL SOCKET which stimulates microphone noises from the tubes. In mounting this socket, round wood screws of number

size wire gauges and at least one inch long should be used.

In the box of the SIGNAL SOCKET there are two brackets for panel mounting. These are not to be used. Also there are two brass machine screws with a washer of brass and one of soft rubber.

Slip the two washers off the machine screw and place them on the wood screws. Then fasten the sockets down. Do not run the screws in so far that the socket has no play on the rubber feet. You should be able to move the socket up and down slightly.

This photo should indicate to you how the ELECTRAD VARIOM units are mounted. One is directly behind the center 12Y 130. With the ELECTRAD VARIOM are supplied screws of sufficient length to enable you to slip the DUBILIER fixed capacitors over the screws and then mount them directly on the grid posts of the sockets.

If you are in doubt as to just how these units are mounted, come into the Radio Laboratory and we will be glad to instruct you. If you can't come, write us for a rough sketch of this mounting. In fact, if you are in doubt about anything, write or come in.

ONE THING I WANT TO EMPHASIZE UPON THIS READER IS THE NECESSITY OF STATING YOUR TROUBLES IN DETAIL WHEN WRITING THIS DEPARTMENT ABOUT THEM. Many letters read, "My set does not work, what is the matter?" This is somewhat exaggerated, but many letters are nearly as hard to answer.

We receive of many letters asking for personal answers that this department will be forced to answer a large number of them through its

DU PONT PANELS SUPERIOR IN DIALECTRIC QUALITIES

Remarkable Material Called Pyradoloin

Made Official for the Four-R Receiver

Developed by Du Pont Engineers after months of experimentation, this new panel material combines unusual beauty with every desirable radio quality.

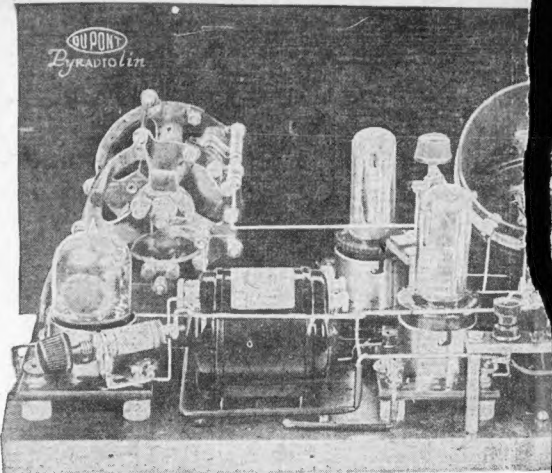

The Craft High Tension Electrical Laboratory of Harvard tested Pyradoloin and pronounced it to have exceptional dielectric and hydroscopic qualities. In addition, its semi-flexibility does away with the detrimental buckling which results when a rigid panel is forced to follow the unevenness found in many cabinets.

Pyradoloin can literally be worked as easily as a piece of soft pine, yet while in place it holds instruments with permanent rigidity. Each panel is packed with a cross-section working sheet which makes laying out easy. Your dealer can probably supply you also with control dials to match. If not, simply phone our Boston office.

- 1 Re-Vi-Ve 45-volt B batteries.
- 1 Roll of Taping Tape.
- 1 Dynaco Loud Speaker.

very Column. If your question is not answered through this column DO NOT SEND STAMPS for formal answers. We are already out one month behind in answering these personal letters. Some of you will have to go through the very Column in order to clear the air. Watch for them daily. Your fluid will indicate your question. When you write in about your Dubilier STATE the following facts: Is it of circuit or not, make of parts, Is it dry cells or storage battery, Is A and B antenna and ground connections used, best distance received, the set, and state what the trouble seems to be, such as noise, lack of volume, signals, no regeneration, no neutralization, continuous chattering, no condenser does not tune, fails to tune sharply, less volume on second stage than on first, etc. If you state these things clearly I just what part of set is giving you the trouble for you. REMEMBER this, however, that it is not all possible to locate trouble without actually testing out the receiver part.

DUST IN SETS CUTS DOWN VOLUME

Dust in a radio receiver will cut down the volume of sound the receiver produces and keep out many of the less powerful stations which would otherwise come through.

A beautiful job of mounting and wiring can be spoiled by a coating of dust. No insulation is good for radio unless it is kept clean. The inside of a set should be dusted as frequently as the outside and should be kept as bright and neat as it was when it was new.

When a set begins to lose its volume after two or three months, the vacuum tubes are usually blamed, but good tubes seldom show a decrease in efficiency until they have been used for six months or more. It is more likely that dust has accumulated where it can do damage in the set.

In the design of the finest radio receivers insulation is an important question. The Bureau of Standards in Washington tests insulations so that all can benefit by knowing just how much change can be expected by heat, moisture in the air and various other conditions. The effect of sunlight upon insect rubber is even considered, because sunlight changes the resistance slightly.

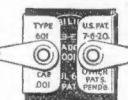

These properties of insulation are carefully considered, and when a set is made of the best materials because it is just a little bit better than anything else. It is unfair to the set and its builders to allow dust to accumulate and break down this insulation.

METAL IN DUST

Dust is composed of metal as well as lint and seeds. It has been said that each square of virgin soil on the surface of the earth contains part of every other square foot on the surface of the earth. This means that dust coming through the air is composed of fragments of rock from the pyramids of Egypt as well as iron from the furnaces of New Jersey and New York. Such particles settling in a radio set cause leakage of the high frequency current.

If dust is deposited between the aerial and the ground, the pulse from a distant station may leak across and be dissipated before it has a chance to enter the receiver.

Micadons

Fixed Condensers!

Micadons are the standard fixed condensers of radio. Manufacturers and fans prize them because they have permanent capacity—and because their structure makes installing so easy. In fact—they are used in 9 out of every 10 sets.

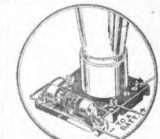

35c to 75c

Dubilier

CONDENSERS AND RADIO CORPORATION

NOW -it's the "SELF ADJUSTING" RHEOSTAT

So simple there's nothing to it—just hook up an Amperite in series with each tube inside the set—and your tube current is all taken care of automatically.

No hand rheostats, no meters, no guessing, no tube worry. And greatly simplified set construction and operation. Specified in Boston American Four-R. You can't get the most out of your set—without Amperite.

Hear the Difference with a Simplex Tuner

Sharper tuning, greater volume, bell-like clarity—these are the reasons you should have the Simplex DX Tuner in your set.

Spiral-wound, thin, flat, molded rotor with 180 degree range—special windings spaced just right for full volume and extreme selectivity—no solution used to hold windings—these explain Simplex high efficiency.

All metal parts brass, nickel-plated, except two aluminum bracket castings. Binding posts on rear of tube do away with need for soldering.
